Work History

2022-12 -

Current

Senior Full Stack Web Developer

Amaris Consulting, Montreal, QC

As a full-stack developer contractor, I actively contribute to the migration process of two report portals for the Quebec government. Collaborating with a geographically dispersed team of developers across various locations in Quebec, we collectively work towards achieving project milestones.

Skills: SAML 2.0 · Next.js · React.js · JavaScript · TypeScript · Git · Node.js

2019-11 -

2022-11

Senior Lead Web Developer

SimplyPHP, Montreal, QC

As a senior lead and full-stack web developer, I am proficient in handling various intricate projects that require the use of front-end languages like JavaScript/TypeScript, back-end languages like PHP/Node, and SQL databases such as MySQL/PostgreSQL.

Responsibilities: Senior Web Developer

Assisting customers in maximizing the potential of their code by incorporating novel functionalities into ongoing projects and preserving code in accordance with client specifications. Establishing both local and remote environments through the utilization of Docker, CI/CD, AWS, Git, and Serverless.

Responsibilities: Technical Lead

Cloud (AWS/GCP) ●●●●○ Very Good

Additional Information

Citizenships: French, Canadian

2017-03 - 2017-07

2014-06 - 2017-03

Responsibilities include organizing and overseeing weekly scrum meetings, as well as providing guidance and support to the developers within the team.

Skills: AWS CloudFormation · Next.js · Amazon Web Services (AWS) · React.js · JavaScript · TypeScript · PHP · Git · Node.js

Backend Developer

nventive, Montreal, QC

I have experience working on extensive projects utilizing both the Symfony Framework and the Phalcon Framework in PHP5 and PHP7. These projects are developed within a Docker local environment and deployed on cloud platforms such as Amazon AWS and Azure DevOps.

Skills: React.js · JavaScript · PHP · Symfony Framework · Git

Web Developer

Tink, Montreal, QC

Development of modules and websites utilizing the Drupal 7 and 8 frameworks. Implementation of projects and applications through the efficient utilization of Jenkins. Responsibilities: Development of modules and websites utilizing the Drupal 7 and 8 frameworks. Implementation of projects and applications through the efficient utilization of Jenkins.

Skills: JavaScript · PHP · Git

Back End Developer

Kaliop Canada, Montreal, QC

Develop projects utilizing PHP5 or Javascript framework and CMS, both for new and existing projects. Collaborate effectively on projects by utilizing version control systems such as GitHub or Bitbucket. Responsibilities: Develop projects utilizing PHP5 or Javascript framework and CMS, both for new and existing projects. Collaborate effectively on projects by utilizing version control systems such as GitHub or Bitbucket.

Skills: JavaScript · PHP · Symfony Framework · Git · Docker

Education

2012-01 - *Université Pierre Mendès-France - Grenoble*
2013-01 Specialist development technologies for the web and integration of multimedia content (pictures, 3D scenes mobile development with Android).

Projects

Untitled Music Project

Jan 2022 - Present

This social platform for music enthusiasts facilitates connections with individuals from all corners of the globe, enables the discovery of like-minded individuals with similar musical preferences, and provides access to the latest news and podcasts from their favorite artists. Additionally, users can safely enjoy live streams from the comfort of their own homes and much more.

The development of this project involved the utilization of cutting-edge technologies such as Typescript and React, as well as frameworks like NestJS and Next.js. Furthermore, this platform is hosted on the AWS platform and leverages Serverless technologies such as Lambda, in addition to multiple other AWS services.
